Muhammad Ibrahim Butt

Senior Software Engineer | Backend, Cloud, Distributed Systems

Faisalabad, Pakistan | m.ibrahim8325@gmail.com | +92 311 8663209 | linkedin.com/in/muhammad-ibrahim-butt

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building scalable backend systems, cloud-native applications, and distributed platforms. Strong background in Python, Node.js, AWS, microservices, and API architecture, with a track record of improving system performance, reliability, and deployment efficiency. Experienced in delivering production-grade solutions across SaaS, cloud, and AI-enabled environments.

CORE SKILLS

Languages & Frameworks: Python, Django, Flask, PHP, Laravel, C#, .NET, Entity Framework, Dapper, JavaScript, TypeScript, Node.js, Express.js
Frontend: React, Next.js, Vue.js, Nuxt.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, React Query, Vite
Databases & Data: PostgreSQL, MySQL, Microsoft SQL Server, SQLite, MongoDB, Redis, Kafka, SSIS, ETL Pipelines, Data Aggregation, Data Modeling, Vector Databases
Cloud & DevOps: AWS (EC2, S3, Lambda, SageMaker), Microsoft Azure, Docker, Kubernetes, OpenShift, Rancher, Jenkins, GitHub Actions, CI/CD, Linux, Nginx, Terraform, Prometheus, Grafana
AI & ML: TensorFlow, PyTorch, Scikit-learn, Transformers, LangChain, AutoGen, RLHF, model evaluation, benchmarking, fine-tuning, agentic AI workflows
Engineering: REST APIs, GraphQL, WebSockets, Microservices Architecture, System Design, Software Architecture, QuickBooks API, Postman, Swagger

PROFESSIONAL EXPERIENCE

Pod Lead (Contract) | Turing

Palo Alto, California (Remote) | Aug 2025 – April 2026

- Lead a pod of 10 AI trainers focused on agentic AI development, model evaluation, reinforcement learning from human feedback (RLHF), and multi-step reasoning for enterprise use cases.
- Managed the end-to-end lifecycle of agentic AI training and evaluation, improving task completion rates by 40% and reducing deployment time by 60% across complex, multi-step workflows.
- Built training protocols and evaluation frameworks that improved model accuracy by 35%, reduced harmful outputs by 85%, and supported benchmarking across 500+ test scenarios.

Senior Software Engineer (Contract) | Linx Computations Inc.

New York, NY (Remote) | May 2024 – Present

- Developed and maintained a Laravel-based POS, inventory, stock, and ledger management system used to streamline retail operations.
- Built a C# desktop application integrated with QuickBooks to automate invoice generation, customer synchronization, and financial reporting.
- Implemented bi-directional QuickBooks API integrations that reduced manual data entry by 60% and improved accounting workflow accuracy.
- Delivered Laravel modules for transaction tracking, real-time stock updates, and vendor management, improving workflow efficiency by 40% and reducing backend response time by 50% under high load.

Senior Software Engineer (Full-time) | DevXen

Wollongong, New South Wales (Remote) | May 2024 – Jul 2025

- Improved API response time by 70% by optimizing backend workflows, data access patterns, and service-to-service communication.
- Designed and deployed scalable microservices that reduced server load by 60% and improved application availability.
- Automated key engineering workflows, cutting manual effort by 50%, while improving SQL query performance by 80%.
- Built a C# reporting system that reduced report generation from hours to minutes and established Jenkins- and Git-based CI/CD pipelines that cut release time by 75%.

Senior Software Engineer | Microbeck

Faisalabad, Pakistan | Jul 2022 – Apr 2024

- Led migration of legacy services to cloud-native infrastructure using Docker, Kubernetes, and AWS, reducing server costs by 30% and supporting 99.9% uptime.
- Automated repetitive workflows and backend processes, reducing manual processing time by 50% and improving team focus on higher-value work.
- Optimized backend performance with Redis caching, cutting API latency by 60%, and built real-time data pipelines that increased processing speed by 50%.

- Configured DevOps pipelines and release automation that accelerated deployment cycles and reduced deployment failures by 45%.

Software Engineer | Microbeck

Faisalabad, Pakistan | Aug 2021 – Jun 2022

- Built and optimized Django- and JavaScript-based internal dashboards that improved decision-making speed by 50%.
- Automated recurring tasks to reduce manual effort by 70%, saving 15+ hours per week and lowering operational errors.
- Improved application performance and delivery speed, contributing to a 15% increase in user retention and a 20% reduction in support tickets.

SELECTED PROJECTS

Invoices Tax Calculator | Linx Computations Inc. | May 2024 – May 2025

- Developed a desktop application that automated tax calculations for 10,000+ invoices across customizable date ranges.
- Implemented U.S. state-specific tax rules with 99.9% computation accuracy, improving compliance and reducing manual calculation errors by 40%.

Sentiment Analysis Tool | DevXen | May 2024 – May 2025

- Built a Python-based NLP application using NLTK and spaCy to classify customer sentiment across multiple feedback channels.
- Reached 85% sentiment classification accuracy and automated data preprocessing and model training workflows, reducing manual effort by 60%.

Predictive Maintenance System | DevXen | May 2024 – May 2025

- Designed a machine learning system using Random Forest and XGBoost to analyze data from 500+ industrial machines in real time.
- Improved failure prediction accuracy by 20%, reduced unplanned downtime by 25%, and contributed to approximately $200K in annual maintenance savings.

Saral Diagnostics | Freelance | Jan 2022 – Dec 2024

- Contributed as a full-stack developer to a diagnostics platform, improving user satisfaction by 20% through front-end and back-end enhancements.
- Built responsive UI components with JavaScript and Bootstrap and optimized PHP/MySQL services, reducing reported issues by 35%.

EDUCATION

Bachelor of Science in Computer Science | National University of Computer and Emerging Sciences, Pakistan | 2021 | CGPA: 3.10
