Muhammad Ibrahim Butt

Senior Software Engineer | AI Automation, Backend & Full-Stack Development
Faisalabad, Pakistan | Remote Global | m.ibrahim8325@gmail.com | +92 311 8663209
linkedin.com/in/muhammad-ibrahim-butt | github.com/muhammad-ibrahim-butt | muhammad-ibrahim-butt.github.io

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building AI-assisted automation workflows, backend-heavy full-stack products, and integration-driven systems for remote teams. Strong in Laravel/PHP, Python, C#/.NET, Node.js, SQL, REST APIs, AWS, Docker, queues, CI/CD, LLM evaluation, RAG workflows, and business process automation. Known for turning messy operational requirements into maintainable APIs, data models, admin tools, background jobs, and reliable production workflows.

TECHNICAL SKILLS

AI & Automation: LLM Evaluation, Agentic AI Workflows, RLHF Review, Function-Calling Evaluation, RAG, LangChain, AutoGen, Azure OpenAI, Azure Document Intelligence, NLP, Scikit-learn, XGBoost, PyTorch, TensorFlow
Backend & APIs: Laravel, PHP, Python, Django, Flask, Node.js, Express.js, C#/.NET, REST APIs, GraphQL, WebSockets, Microservices, System Design, Software Architecture
Full-Stack: React, Next.js, Vue.js, Nuxt.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, React Query, Vite
Data & Messaging: PostgreSQL, MySQL, SQL Server, SQLite, MongoDB, Redis, Kafka, ETL Pipelines, Data Modeling, Vector Search/Databases
Cloud, DevOps & Integrations: AWS EC2/S3/Lambda/SageMaker, Azure, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Linux, Nginx, Terraform, Prometheus, Grafana, Stripe, Salesforce Webhooks, QuickBooks Desktop/API/QBXML, Firebase, OAuth/Socialite, Pusher

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Contract) | Linx Computations Inc.
New York, NY (Remote) | May 2024 - Present
- Build Laravel/PHP, C#/.NET, and QuickBooks-centered systems for POS, inventory, ledger, vendor, reporting, and retail operations workflows.
- Improved C# desktop application startup and loading from 2-3 minutes to about 10 seconds by optimizing startup data loading, caching, and workflow execution.
- Integrated QuickBooks Desktop automation for invoices, customers, items, purchase orders, tax reports, and accounting data synchronization.
- Automated tax and reporting workflows across 10,000+ invoices, reducing repetitive manual entry and improving accounting workflow accuracy.

Tech: Laravel, PHP, C#/.NET, QuickBooks Desktop, QBXML/QBFC, MySQL, SQLite, REST APIs, Windows Services, RDLC Reports

Freelance Software Engineer - AI Automation, Backend & Full-Stack | Fiverr & Direct Clients
Remote Global | Jun 2019 - Present (Project-based)
- Deliver backend-heavy full-stack systems for legal operations, job discovery, diagnostics, workflow automation, admin dashboards, and integration-heavy client products.
- Own API design, database modeling, service-layer architecture, background jobs, validation, deployments, client communication, and production support across freelance engagements.
- Built WEPROCESS workflows for role-based APIs, legal serve lifecycle management, Salesforce webhooks, Azure AI document extraction, Stripe billing, queues, realtime chat, notifications, and PDF generation.
- Built Sivee.ai workflows for candidate onboarding, CV/profile management, Google OAuth, admin controls, engagement analytics, job scraping ingestion, scheduled upserts, and notification emails.

Tech: Laravel 10/11, PHP 8+, MySQL, Sanctum, Queues, Schedulers, Stripe, Salesforce, Azure OpenAI, Azure Document Intelligence, Pusher, Socialite

AI Agent Evaluation Expert (Contract) | Mindrift (Toloko AI)
Vienna, Austria (Remote) | July 2026 - Present
- Serve as an SDLC evaluation expert on Mindrift's SDLC Author Grading V2 project, assessing AI coding agents' software-development task outputs.
- Evaluating performance of agents along a two-dimensional scale of criteria – quality of behavior and correctness, providing structured input for agents' training workflows.
- Conduct pairwise preference comparisons between agent attempts (behavior + correctness dimensions) to support model alignment.
- Perform meta-evaluation by reviewing and rating automated grader transcripts for scoring quality and consistency

Tech: Python, Git/GitHub, AI Coding Agents, Rubric-Based Grading, Pairwise Preference Evaluation, RLHF Data Pipelines

AI Evaluation Task Author (Contract) | AfterQuery
Palo Alto, CA (Remote) | May 2026 - Present
- Designed six hard coding-agent evaluation tasks across SWE-bench-style debugging and Harbor-based terminal environments using Python, PHP, Laravel, and Django.
- Built Dockerized environments, reference solutions, and 90 automated behavioral checks covering ML quantization, compiler internals, cybersecurity, batch fault isolation, and business workflow validation.
- Authored clear task specifications and anti-cheat test harnesses with deterministic JSON/TSV contracts, synthetic fixtures, edge-case coverage, and reproducible NOP/oracle verification.
- Iterated tasks against CI, rubric, similarity, originality, difficulty, agent-quality, and solution-leakage checks to produce fair and technically rigorous evaluations.

Tech: Python, Pytest, PHP, Laravel, Django, Docker, Bash, TOML, JSON/TSV, Harbor, SWE-bench, LLM Evaluation, Coding Agents

AI Evaluator (Contract) | Meridial Marketplace, by Invisible
Remote | Jul 2026 - Present
- Serving as an expert evaluator on Meridial's Audio Agent Evals project, reviewing voice/audio AI agent outputs as part of an RLHF human-feedback pipeline.
- Assessing agent response quality and correctness to support model training and calibration workflows.

Tech: Audio Agent Evaluation, RLHF, Expert Review, Quality Rubrics

Pod Lead (Contract) | Turing
Palo Alto, CA (Remote) | Aug 2025 - Apr 2026

- Led a 10-person AI trainer pod focused on agentic AI development, LLM evaluation, RLHF-style review, function calling, tool-use reasoning, and multi-step enterprise tasks.
- Created and reviewed model-evaluation protocols across 500+ benchmark scenarios, improving reviewer consistency, rubric adherence, and stakeholder issue visibility.
- Analyzed recurring model failures across reasoning, safety behavior, instruction following, and tool-use decisions; translated findings into clearer training and quality-review guidance.

Tech: LLM Evaluation, Agentic AI, RLHF, Function Calling, Benchmarking, Prompt Review, Quality Rubrics, Pod Leadership

AI Evaluator (Contract) | Mercor

San Francisco, CA (Remote) | Nov 2025 - Jan 2026

- Evaluated Claude model outputs through side-by-side comparisons against identical prompt sets, scoring reasoning depth, instruction adherence, safety behavior, and action correctness.
- Performed systematic error analysis to identify hallucinations, weak tool-use decisions, incomplete reasoning, and inconsistent execution patterns for production-readiness review.

Tech: Claude Evaluation, Model Comparison, Prompt-Based Testing, Safety Review, Failure Analysis, Structured Reviewer Feedback

Senior Software Engineer (Full-time) | DevXen

Wollongong, NSW (Remote) | May 2024 - Jul 2025

- Optimized API performance through backend workflow improvements, SQL tuning, data-access refactoring, and service-to-service communication changes.
- Designed scalable microservices and automation workflows that improved system availability and reduced repetitive engineering and operations effort.
- Built C# reporting and data-processing tools that reduced report generation from hours to minutes and supported NLP sentiment analysis and predictive-maintenance ML workflows.

Tech: Python, Node.js, C#/.NET, SQL, Microservices, Scikit-learn, NLP, XGBoost, Jenkins, Git, CI/CD

Senior Software Engineer | Microbeck

Faisalabad, Pakistan | Jul 2022 - Apr 2024

- Migrated legacy services toward cloud-native infrastructure using Docker, Kubernetes, AWS, Redis caching, CI/CD, and release automation.
- Improved API latency and backend throughput through query optimization, caching, data-pipeline improvements, and process automation.
- Configured deployment pipelines and release automation to reduce failed deployments and improve operational reliability.

Tech: Python, Django, AWS, Docker, Kubernetes, Redis, PostgreSQL, CI/CD, Linux, Nginx

Software Engineer | Microbeck

Faisalabad, Pakistan | Aug 2021 - Jun 2022

- Built and optimized Django and JavaScript dashboards for internal operations, reporting, and decision-support workflows.
- Automated recurring backend processes, saving 15+ hours per week and reducing manual operational errors.

Tech: Python, Django, JavaScript, MySQL, Internal Dashboards, Automation

SELECTED PROJECTS

QBSalesStar / QuickBooks Automation Platform | Linx Computations Inc. | 2024 - Present

Built C#/.NET and Laravel/PHP automation around QuickBooks Desktop for sales orders, invoices, purchase orders, receiving, returns, reporting, file uploads, local caching, and accounting synchronization.

Tech: C#/.NET, Laravel, PHP, QuickBooks SDK/QBFC/QBXML, MySQL, SQLite, REST APIs, Windows Services, RDLC Reports

WEPROCESS Legal Operations Platform | Freelance | Mar 2025 - Present

Built a production Laravel backend for legal process serving with role-separated client, admin, and driver workflows; Salesforce intake; Azure AI document extraction; Stripe billing; legal-aid/VAT invoice rules; queues; realtime chat; notifications; and PDF generation.

Tech: Laravel 10, PHP 8.1, Sanctum, MySQL, Azure OpenAI, Azure Document Intelligence, Salesforce Webhooks, Stripe, Pusher, Queues

Sivee.ai Candidate & Job Discovery Platform | Freelance | 2025

Built a Laravel 11 candidate/job platform with onboarding, CV/profile lifecycle, Google OAuth, admin dashboards, company/job management, job scraping ingestion, scheduled upserts, engagement tracking, and queued email notifications.

Tech: Laravel 11, PHP 8.2, MySQL, Blade, Bootstrap, Socialite, DataTables, Queues, Schedulers, Job Scraping

AI PDF Chatbot / RAG Assistant | Portfolio Project

Built PDF ingestion, parsing, chunking, embeddings, semantic retrieval, and grounded answer generation using local embeddings and LLM-backed response workflows.

Tech: Python, Streamlit, Flask, LangChain, PDFPlumber, MiniLM, Vector Search, Groq Llama 3.1

EDUCATION

Bachelor of Science in Computer Science | National University of Computer and Emerging Sciences (FAST-NUCES), Pakistan | 2021

CERTIFICATIONS

Introduction to Model Context Protocol | Anthropic
AI Fluency for Builders | CodePath.org & Anthropic
