PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building backend platforms, business automation, and integration-heavy applications. Strong in Laravel/PHP, Python, and C#/.NET, with recent work evaluating AI agents and developing coding benchmarks. Own delivery from system design through deployment and production support.

TECHNICAL SKILLS

Backend & data: Laravel/PHP, Python, C#/.NET, Node.js, REST APIs, SQL, MySQL, PostgreSQL, Redis

AI & automation: Large language model (LLM) evaluation, reinforcement learning from human feedback (RLHF), retrieval-augmented generation (RAG), coding benchmarks, Pytest, LangChain, Azure AI

Delivery & integrations: AWS, Docker, Linux, continuous integration and delivery (CI/CD), queues, QuickBooks SDK/QBXML, Salesforce, Stripe

PROFESSIONAL EXPERIENCE

AI Agent Evaluation Expert | Mindrift

Jul 2026 - Present | Contract | Remote

- Evaluate coding-agent behavior and correctness across software-development tasks using structured rubrics and pairwise comparisons.
- Audit automated grader transcripts for scoring quality and consistency, providing feedback for agent training.

Senior Software Engineer | Linx Computations Inc.

May 2024 - Present | Full-time | Remote

- Build Laravel/PHP and C#/.NET systems for retail operations, inventory, reporting, and QuickBooks Desktop integration.
- Reduced desktop startup/loading from 2-3 minutes to about 10 seconds through data-loading and caching improvements.
- Automated tax and reporting workflows across 10,000+ invoices, with customer, item, and accounting synchronization.

Freelance Software Engineer | Self-employed

Jun 2019 - Present | Project-based | Remote

- Deliver applications from requirements through production support for direct clients and through Fiverr (since Aug 2020), including legal operations and job-discovery platforms.

AI Evaluator - Audio Agent Evals | Meridial Marketplace, by Invisible

Jul 2026 - Oct 2026 | Contract | Remote

- Reviewed voice/audio agent outputs for response quality and correctness, contributing human feedback for training and calibration.

Full Stack Engineer | AfterQuery Experts

May 2026 - Oct 2026 | Contract | Remote

- Designed six coding-agent evaluation tasks with Docker environments, reference solutions, and 90 automated behavioral checks.
- Built reproducible test harnesses for debugging, backend, security, and compiler tasks; checked task difficulty and resistance to shortcuts.

PROFESSIONAL EXPERIENCE (CONTINUED)

Pod Lead | Turing

Aug 2025 - Apr 2026 | Contract | Remote

- Led a 10-person AI trainer pod focused on LLM evaluation, function calling, tool-use reasoning, and multi-step tasks.
- Created and reviewed evaluation protocols across 500+ scenarios; translated recurring model failures into clearer review guidance.

Contractor - AI Evaluation | Mercor

Nov 2025 - Jan 2026 | Contract | Remote

- Compared Claude outputs for reasoning, instruction following, safety, and tool-use correctness; documented recurring failure patterns.

Senior Software Engineer | DevXen

May 2024 - Jul 2025 | Part-time | Pakistan | Hybrid

- Optimized backend services and API performance through SQL tuning and workflow improvements; developed microservices and deployment automation.
- Built C# reporting tools that reduced report generation from hours to minutes and supported applied ML workflows.

Senior Software Engineer | Microbeck Private Limited

Jul 2022 - Apr 2024 | Full-time | Faisalabad | On-site

- Modernized backend infrastructure with Docker, AWS, Redis, and CI/CD; improved query performance, caching, and deployment reliability.

Software Engineer | Microbeck Private Limited

Aug 2021 - Jun 2022 | Full-time | Faisalabad | On-site

- Built Django and JavaScript dashboards and automated recurring processes, saving 15+ hours of manual work per week.

Web Developer | Microbeck Private Limited

Jul 2020 - Oct 2020 | Part-time | Hybrid

SELECTED PROJECTS

QBSalesStar - QuickBooks operations platform connecting desktop and web workflows with event-driven synchronization, local caching, retry handling, and Windows Services. Case study

WEPROCESS - Laravel legal-operations backend integrating Salesforce intake, Azure AI document extraction, Stripe billing, background queues, and role-separated workflows. Case study

Sivee.ai - Laravel candidate and job platform with profile management, Google OAuth, admin controls, and scheduled ingestion from a Python job extractor. Case study

AI PDF Chatbot - Python RAG assistant with PDF parsing, local MiniLM embeddings, semantic retrieval, and Groq-backed answers; Streamlit UI and Flask prototype. Case study

EDUCATION

Bachelor of Science in Computer Science | 2021
National University of Computer and Emerging Sciences (FAST-NUCES), Pakistan
