## PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of development experience spanning backend systems, AI applications, and agent evaluation. Authored 36 approved benchmark tasks and independently built a Laravel training sandbox used by approximately 50 trainers. Application work includes Azure document-processing APIs and a Python RAG prototype.

## TECHNICAL SKILLS

**Evaluation:** LLM and coding-agent evaluation, RLHF, structured rubrics, pairwise comparisons, function calling, tool-use reasoning, grader audits

**Engineering:** Python, Pytest, Docker, Linux, CI/CD, REST APIs, Laravel/PHP, C#/.NET, SQL

**AI applications:** Retrieval-augmented generation (RAG), Azure OpenAI, Azure Document Intelligence, LangChain, MiniLM embeddings, Groq

## AI ENGINEERING & EVALUATION EXPERIENCE

### AI Agent Evaluation Expert | Mindrift

Jul 2026 - Present | Contract | Remote

- Evaluate coding-agent behavior and correctness across software-development tasks using structured rubrics and pairwise comparisons.
- Audit automated grader transcripts for scoring quality and consistency; provide feedback for agent training.

### Full Stack Engineer | AfterQuery Experts

May 2026 - Oct 2026 | Contract | Remote

- Authored 36 approved coding-agent benchmark tasks across two evaluation projects, with reproducible Docker environments, reference solutions or patches, and automated verifiers.
- Built Python/Pytest and repository-based evaluations covering Laravel, Django, JavaScript, backend reliability, security, and infrastructure; assessed task difficulty and resistance to shortcuts.

### Pod Lead | Turing

Aug 2025 - Apr 2026 | Contract | Remote

- Onboarded 10 trainers from 20 initial joiners; managed trainers, assigned reviewers, and throughput, coordinating directly with the project manager. Built progress-reporting tools.
- Independently built a Laravel onboarding sandbox reproducing client function-calling workflows, with practice tasks, quizzes, and scoring; used by approximately 50 trainers.

## SELECTED AI APPLICATIONS

**WEPROCESS | Client project | AI document processing**
Owned the complete Laravel APIs, including a queued pipeline using Azure Document Intelligence and Azure OpenAI to extract structured fields from legal documents. Added required-field checks, extraction-status tracking, and partial-failure handling. Case study

**AI PDF Chatbot | Personal project | Python RAG**
Built a Python RAG prototype independently, with PDF ingestion, chunking, MiniLM embeddings, cosine-similarity retrieval, Groq responses, and a Streamlit interface. Cached the embedding model and skipped re-indexing repeated uploads. Case study

## SOFTWARE ENGINEERING EXPERIENCE

**Senior Software Engineer | Linx Computations Inc.**

May 2024 - Present | Full-time | Remote

- Modernize a 10-year-old C#/.NET platform as sole current developer, supporting 3 clients with 10-15 workstations per warehouse.
- Reduced full application-context loading from 2-3 minutes to 3-5 seconds, including on low-end hardware.
- Automated monthly state-specific sales-tax calculations for 10,000+ invoices: 5 minutes or less of processing versus a 4-5-person team working about one week manually.
- Automated QuickBooks payee/account mapping: one operator and 5-10 seconds of processing versus 4-5 staff working 3-4 days manually. Processing times exclude preparation and review.

**Freelance Software Engineer | Self-employed**

Jun 2019 - Present | Project-based | Remote

- Deliver legal-operations and job-discovery applications for direct clients and through Fiverr, covering requirements, implementation, deployment, and production support.

**Senior Software Engineer | DevXen**

May 2024 - Jul 2025 | Part-time | Pakistan | Hybrid

- Improved backend services and APIs through SQL tuning; built C# reporting tools that reduced report generation from hours to minutes and supported applied ML workflows.

**Microbeck Private Limited**

**Senior Software Engineer** | Jul 2022 - Apr 2024

Full-time | Faisalabad | On-site

- Modernized backend infrastructure with Docker, AWS, Redis, and CI/CD, improving query performance, caching, and deployment reliability.

**Software Engineer** | Aug 2021 - Jun 2022

Full-time | Faisalabad | On-site

- Built Django and JavaScript dashboards and automated recurring processes, saving 15+ hours of manual work per week.

**Web Developer** | Jul 2020 - Oct 2020 | Part-time | Hybrid

## ADDITIONAL AI EVALUATION EXPERIENCE

**AI Evaluator - Audio Agent Evals | Meridial Marketplace, by Invisible**

Jul 2026 - Oct 2026 | Contract | Remote

- Reviewed voice/audio agent outputs for quality and correctness, providing human feedback for training and calibration.

**Contractor - AI Evaluation | Mercor**

Nov 2025 - Jan 2026 | Contract | Remote

- Compared Claude outputs for reasoning, instruction following, safety, and tool-use correctness; documented recurring failure patterns.

## EDUCATION

**Bachelor of Science in Computer Science | 2021**

National University of Computer and Emerging Sciences (FAST-NUCES), Pakistan
