PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience in backend platforms, automation, and AI applications using Laravel/PHP, C#/.NET, and Python. Modernize legacy systems and automate finance workflows processing 10,000+ invoices monthly. AI work includes 36 approved coding-agent benchmark tasks, evaluation leadership, and independently built training tools.

TECHNICAL SKILLS

Backend & data: Laravel/PHP, C#/.NET, Python, REST APIs, SQL, MySQL, PostgreSQL, Redis

AI & evaluation: LLM evaluation, coding benchmarks, Pytest, RLHF, RAG, LangChain, Azure OpenAI, Azure Document Intelligence

Delivery & integrations: AWS, Docker, Linux, CI/CD, queues, QuickBooks SDK/QBXML, Salesforce, Stripe

SELECTED BACKEND & AI EXPERIENCE

Senior Software Engineer | Linx Computations Inc.

May 2024 - Present | Full-time | Remote

- Modernize a 10-year-old C#/.NET platform as sole current developer, supporting 3 clients with 10-15 workstations per warehouse.
- Reduced full application-context loading from 2-3 minutes to 3-5 seconds, including on low-end hardware.
- Automated monthly state-specific sales-tax calculations for 10,000+ invoices: 5 minutes or less of processing versus a 4-5-person team working about one week manually.
- Automated QuickBooks payee/account mapping: one operator and 5-10 seconds of processing versus 4-5 staff working 3-4 days manually. Processing times exclude preparation and review.

AI Agent Evaluation Expert | Mindrift

Jul 2026 - Present | Contract | Remote

- Evaluate coding-agent behavior and correctness across software-development tasks using structured rubrics and pairwise comparisons.
- Audit automated grader transcripts for scoring quality and consistency; provide feedback for agent training.

Full Stack Engineer | AfterQuery Experts

May 2026 - Oct 2026 | Contract | Remote

- Authored 36 approved coding-agent benchmark tasks across two evaluation projects, with reproducible Docker environments, reference solutions or patches, and automated verifiers.
- Built Python/Pytest and repository-based evaluations covering Laravel, Django, JavaScript, backend reliability, security, and infrastructure; assessed task difficulty and resistance to shortcuts.

Pod Lead | Turing

Aug 2025 - Apr 2026 | Contract | Remote

- Onboarded 10 trainers from 20 initial joiners; managed trainers, assigned reviewers, and throughput, coordinating directly with the project manager. Built progress-reporting tools.
- Independently built a Laravel onboarding sandbox reproducing client function-calling workflows, with practice tasks, quizzes, and scoring; used by approximately 50 trainers.

ADDITIONAL PROFESSIONAL EXPERIENCE

Freelance Software Engineer | Self-employed

Jun 2019 - Present | Project-based | Remote

- Deliver legal-operations and job-discovery applications for direct clients and through Fiverr, covering requirements, implementation, deployment, and production support.

AI Evaluator - Audio Agent Evals | Meridial Marketplace, by Invisible

Jul 2026 - Oct 2026 | Contract | Remote

- Reviewed voice/audio agent outputs for quality and correctness, providing human feedback for training and calibration.

Contractor - AI Evaluation | Mercor

Nov 2025 - Jan 2026 | Contract | Remote

- Compared Claude outputs for reasoning, instruction following, safety, and tool-use correctness; documented recurring failure patterns.

Senior Software Engineer | DevXen

May 2024 - Jul 2025 | Part-time | Pakistan | Hybrid

- Improved backend services and APIs through SQL tuning; built C# reporting tools that reduced report generation from hours to minutes and supported applied ML workflows.

Microbeck Private Limited

Senior Software Engineer | Jul 2022 - Apr 2024

Full-time | Faisalabad | On-site

- Modernized backend infrastructure with Docker, AWS, Redis, and CI/CD, improving query performance, caching, and deployment reliability.

Software Engineer | Aug 2021 - Jun 2022

Full-time | Faisalabad | On-site

- Built Django and JavaScript dashboards and automated recurring processes, saving 15+ hours of manual work per week.

Web Developer | Jul 2020 - Oct 2020 | Part-time | Hybrid

SELECTED BACKEND & AI PROJECTS

WEPROCESS | Client project | Backend & AI
Owned the complete Laravel API implementation for client, driver, and admin workflows. Integrated Salesforce intake, Stripe billing, and queued document extraction using Azure Document Intelligence and Azure OpenAI, with required-field checks and failure handling. Case study

QBSalesStar | Employer project | C#/.NET
Sole current developer modernizing a 10-year-old C# application inherited from another developer. Own frontend, backend, QuickBooks integration, synchronization recovery, and deployment for 3 clients with 10-15 workstations per warehouse. Case study

AI PDF Chatbot | Personal project | Python RAG
Built a Python RAG prototype independently, with PDF ingestion, chunking, MiniLM embeddings, cosine-similarity retrieval, Groq responses, and a Streamlit interface. Cached the embedding model and skipped re-indexing repeated uploads. Case study

EDUCATION

Bachelor of Science in Computer Science | 2021
National University of Computer and Emerging Sciences (FAST-NUCES), Pakistan
